

Life moves fast. Your epinephrine should keep up.

Real patient
and caregiver.

Not actual size.

neffy is a nasal spray used for emergency treatment of allergic reactions including anaphylaxis, in adults and children who weigh 33 lbs or greater.

Allergic reactions are stressful enough. Treatment doesn't have to be.
neffy is needle-free and built for real life.

How does **neffy** work?

neffy uses Intravail® technology to temporarily loosen the spaces between nasal cells, allowing epinephrine to be rapidly absorbed through the nasal passage to stop the reaction.

Does **neffy** work as well as a needle-injector?

Yes! **neffy** works as well as a needle-injector and starts to work in your body in under a minute, delivering epinephrine quickly to stop the reaction.

neffy may cause side effects including nasal discomfort, headache, and runny nose. These are not all the side effects so it is important to talk to a doctor about any medical conditions or medications to determine if **neffy** is the right option.

Is the epinephrine in **neffy** the same as a needle-injector?

Yes! **neffy** delivers the same trusted epinephrine as a needle-injector, but in a nasal spray. The epinephrine works the same way in your body, including increasing blood pressure and heart rate.

Do I have to inhale when using **neffy**?

No! Inhalation is not required. **neffy** can be administered to a patient in any position (eg, sitting, standing, lying, reclining), making it easy to use anywhere.

WHAT IS **neffy**?

neffy is a nasal spray used for emergency treatment of allergic reactions including anaphylaxis, in adults and children who weigh 33 lbs or greater.

IMPORTANT SAFETY INFORMATION

What is the most important information that I should know about neffy?

neffy contains epinephrine, a medicine used to treat allergic emergencies (anaphylaxis). Anaphylaxis can be life-threatening, can happen in minutes, and can be caused by stinging and biting insects, allergy injections, foods, medicines, exercise, or other unknown causes.

Always carry two **neffy** nasal sprays with you because you may not know when anaphylaxis may happen and because you may need a second dose of **neffy** if symptoms continue or come back. Each **neffy** contains a single dose of epinephrine. **neffy** is for use in the nose only.

Use **neffy** right away, as soon as you notice symptoms of an allergic reaction. If symptoms continue or get worse after the first dose of **neffy**, a second dose is needed. If needed, administer a second dose using a new **neffy** in the same nostril starting 5 minutes after the first dose. Get emergency medical help for further treatment of the allergic emergency (anaphylaxis), if needed after using **neffy**.

Tell your healthcare provider if you have underlying structural or anatomical nasal conditions, about all the medicines you take, and about all your medical conditions, especially if you have heart problems, kidney problems, low potassium in your blood, Parkinson's disease, thyroid problems, high blood pressure, diabetes, are pregnant or plan to become pregnant, or plan to breastfeed.

Tell your healthcare provider if you take or use other nasal sprays or water pills (diuretics) or if you take medicines to treat depression, abnormal heart beats, Parkinson's disease, heart disease, thyroid disease, medicines used in labor, and medicines to treat allergies. **neffy** and other medications may affect each other, causing side effects.

Please see the Important Safety Information throughout and the full [Prescribing Information](#) and [Patient Information for neffy](#).

neffy is designed to fit into your life, not just work around it.

When should I use neffy?

As soon as you notice symptoms after exposure to an allergen, use **neffy** immediately. Do not hesitate—the severity of the reaction can quickly change.

Does neffy require training?

There is no training needed. **neffy** is designed to be easy to use so you, a family member, or a bystander are able to use **neffy** at the first sign of symptoms.

Please see **neffy**'s [Instructions for Use](#) on how to administer.

Do I need to prime neffy?

No! Do not prime **neffy**. Each prescription comes with two single-use devices. Each device contains one dose of epinephrine.

How do I dispose of neffy?

No sharps container required. When you're done, **neffy** goes right in the household trash (do not recycle).

Does neffy have to be stored at a specific temperature?

neffy can go where you go. Store **neffy** at room temperature, between 68°F to 77°F (20°C to 25°C). **neffy** can be accidentally exposed to high temperatures up to 122°F (50°C) and remain stable.

Do not freeze **neffy**. **neffy** freezes below 5°F (-15°C). If **neffy** is accidentally frozen, the device will not spray, however **neffy** can be used if it has been thawed at room temperature for 20 minutes without damage to the device or the epinephrine.

Ready. Set. Save.

Eligible patients may pay as little as \$0 for at least 4 **neffy** devices with commercial insurance.* You should not pay more than \$199 for **neffy** if you have a high-deductible insurance plan or your plan doesn't cover **neffy**.

IMPORTANT SAFETY INFORMATION (cont.)

neffy may affect the way other medicines work, and other medicines may affect how **neffy** works.

What are the side effects of neffy?

neffy may cause serious side effects. If you have certain medical conditions or take certain medicines, your condition may get worse, or you may have more or longer lasting side effects when you use **neffy**.

Common side effects of **neffy** include: nasal discomfort, headache, throat irritation, chest and nasal congestion, feeling overly excited, nervous or

anxious, nose bleed, nose pain, sneezing, runny nose, dry nose or throat, tingling sensation, including in the nose, feeling tired, dizziness, nausea, and vomiting.

Tell your healthcare provider if you have any side effects that bother you or that do not go away after using neffy.

These are not all of the possible side effects of **neffy**. Call your healthcare provider for medical advice about side effects. To report side effects, contact ARS Pharmaceuticals Operations, Inc. at **1-877-MY-NEFFY (877-696-3339)** or the FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.
